## Holographic seals

The seals are suitable for marking your 3D objects and at the same time serve as a security and protection element.

It is reflected when the angle of view does not change. We produce and supply these shaped seals (stickers) in sheets. With standard printing and copying machines, these seals cannot be copied or falsified.

We will create your logo in a plastic design and then print it out using metal foil by embossing.

Seals made in this way can be printed both on a sticker and directly on printed sheets.

**Registered seat:** Plučárna 3594/10, 695 01 Hodonín, CZ
